

## **FLSA Audits: Accounting/Auditing Firms Familiar with Fire Department Accounting and Auditing Issues**

As a follow-up to the presentation by Dino Ross & Michelle Ferguson (Ireland Stapleton) at the recent Colorado Fire Service Critical Issues Briefing, "Avoiding Continuing FLSA Violations in FDs," here are some accounting and/or auditing firms that frequently work with fire departments and the unique accounting and auditing issues facing FDs.

While the listed companies are not recommendations or endorsements of any given firm, we also recognize there are other firms in Colorado that have experience in auditing and accounting issues for Fire Departments.

If CSFC's membership can provide the names and contact information for other accounting/auditing firms particularly in other parts of Colorado that may be more accessible to members in different parts of the state and we can add their contact information to this list.

CSFC's members also should keep in mind that auditing/accounting firms do not provide legal advice, and they will typically defer to the fire department's legal counsel for specific questions related to the application or interpretation of the FLSA or other laws.
